Turnkey Solution for HCI, File Storage and Backup Solution

Include following software and license with 3 years 5X9 NBD support of below mentioned HCI NODES (Qty:03 Nodes) and 1 Backup Server Node

1. Executive Summary:

This document provides a complete turnkey HCI solution including 3 HCI nodes, 1 backup server, network switches, firewall, air conditioning, and all necessary software licenses. The solution is designed to handle OMR scanning and e-Marking workloads efficiently while providing high availability, security, and scalability for future growth.

2. Architecture Overview

The proposed solution includes:

- 3 x HCI Nodes (Compute + Storage + Virtualization)
- 1 x Backup Server Node for VM and data backups
- Total Cluster Usable Capacity: ≥ 50 TB.
- Enterprise Network Switches (Main + Backup)
- NGFW Firewall for security and inspection
- Smart Rack with PDUs
- Air Conditioning to maintain optimal environment (Optional)

a) HCI software must contain a single console for automation, service provisioning, troubleshooting & management

1. General Requirements
2. Virtualization Management
3. Virtualization Hypervisor
4. Storage virtualization
5. Backup Server
6. Network Switches

3. HCI Cluster Configuration: 3 × HCI Nodes (minimum)

Rationale for 3-Node Minimum: A 3-node HCI cluster with RF2 (Replication Factor 2) data protection can tolerate a single node failure while maintaining full data availability. During normal operations, data is mirrored across two nodes, and the cluster can automatically rebuild redundancy when a failed node is replaced. For the examination processing workload where system availability is critical during SSC examination periods, 3 nodes provides an appropriate balance of fault tolerance and cost.

4. General Requirements:

- a) The hyper-converged hardware servers are required to be of the same brand.
- b) The HCI computing virtualization software, storage virtualization SDS software, and network virtualization are required to be of the same brand and pre-installed on quoted servers by Principle/OEM to ensure functional reliability, compatibility, and safety.
- c) The computing and storage software in HCI is required to be deployed on bare metal, and the hyper-converged platform can be built without installing a storage controller on the virtual machine to guarantee the best performance.
- d) Socket Based License for 4 Sockets HCI Servers + 2 Sockets Virtualization for Backup Server.
- e) Proposed Solution Must Quote Perpetual Software License with 3 Years Support and Service.
