**EXECUTIVE ENGINEER
RESEARCH DIVISION
KABACHI**

In the case of Quality-Based Selection, Selection Based on Consultant's Qualifications, and Single-Source Selection, the highest ranked consultant or firm selected on a single-source basis is invited to negotiate its proposal and the contract on the basis of the Technical Proposal and the Financial Proposal submitted.

**Public Opening and Evaluation of Financial Proposals:
(LCS, QCBS, and Fixed Budget Selection Methods Only)**

18.2 After the technical evaluation is completed, the PA shall notify in writing Consultants that have secured the minimum qualifying marks, the date, time and location, allowing a reasonable time, for opening the Financial Proposals. Consultants' attendance at the opening of Financial Proposals is optional.

Financial proposals of those consultants who failed to secure minimum qualifying marks shall be returned unopened.

19. Evaluation of Financial Proposals

19.1 Financial Proposals shall be opened publicly in the presence of the Consultants' representatives who choose to attend. The name of the Consultants and the technical scores of the Consultants shall be read aloud. The Financial Proposal of the Consultants who met the minimum qualifying mark will then be inspected to confirm that they have remained sealed and unopened. These Financial Proposals shall be then opened, and the total prices read aloud and recorded. A copy of the record shall be sent to all Consultants.

19.2 The Evaluation Committee will correct any computational errors. When correcting computational errors, in case of discrepancy between a partial amount and the total amount, or between word and figures the formers will prevail. In addition to the above corrections, activities and items described in the Technical Proposal but not priced, shall be assumed to be included in the prices of other activities or items.

19.3 In case of **Least Cost Selection LCS Method**, the bid found to be the lowest evaluated bid shall be accepted.

19.4 **In case of Quality and Cost Based Selection QCBS Method** the lowest evaluated Financial Proposal (Fm) will be given the maximum financial score (Sf) of 100 points. The financial scores (Sf) of the other Financial Proposals will be computed as indicated in the Data Sheet. Proposals will be ranked according to their combined technical (St) and financial (Sf) scores using the weights (T = the weight given to the Technical Proposal; P = the weight given to the Financial Proposal; T + P = 1) indicated in the Data Sheet: $S = St \times T\% + Sf \times P\%$. The firm achieving the highest combined technical and financial score will be invited for negotiations.

19.5 In the case of Fixed-Budget and Quality Based Selection, the Procuring Agency will select the firm that submitted the highest ranked Technical Proposal.

20. Negotiations

20.1 Negotiations will be held at the date and address indicated in the Data Sheet. The invited Consultant will, as a pre-requisite for attendance at the negotiations, confirm availability of all Professional staff. Failure in satisfying such requirements may result in the PA proceeding to negotiate with the next-ranked Consultant. Representatives conducting negotiations on behalf of the Consultant must have written authority to negotiate and conclude a Contract.

21. Technical negotiations

21.1 Technical Negotiations will include a discussion of the Technical Proposal, the proposed technical approach and methodology, work plan, organization and staffing, and any suggestions made by the Consultant to improve the Terms of Reference. The PA and the Consultants will finalize the Terms of Reference, staffing schedule, work schedule, logistics, and reporting. These documents will then be incorporated in the Contract as "Description of Services". Minutes of negotiations, which will be signed by the PA and the Consultant, will become part of Contract Agreement.

22. Financial negotiations

22.1 If applicable, it is the responsibility of the Consultant, before starting financial negotiations, to contact the local tax authorities to determine the tax amount to be paid by the Consultant under the Contract. The financial negotiations will include a clarification (if any) of the firm's tax liability, and the manner in which it will be reflected in the Contract; and will reflect the agreed technical modifications in the cost of the services. Consultants will provide the PA with the information on remuneration rates described in the Appendix attached to Section 4 (i.e. Financial Proposal - Standard Forms of this RFP).

23. Availability of Professional staff/experts

23.1 Having selected the Consultant on the basis of, among other things, an evaluation of proposed Professional staff, the PA expects to negotiate a Contract on the basis of the Professional staff named in the Proposal. Before contract negotiations, the PA will require assurances that the Professional staff will be actually available. The PA will not consider substitutions during contract negotiations unless both parties agree that undue delay in the selection process makes such substitution unavoidable or for reasons such as death or medical incapacity. If this is not the case and if it is established that Professional staff were offered in the proposal without confirming their availability, the Consultant may be disqualified. Any proposed substitute shall have equivalent or better qualifications and experience than the original candidate and be submitted by the Consultant within the period of time specified in the letter of invitation to negotiate.

**EXECUTIVE ENGINEER
RESEARCH DIVISION
KARACHI**

24. Award of Contract

24.1 After completing negotiations, the Procuring Agency shall award the Contract to the selected Consultant and within seven of the award of contract, Procuring Agency shall publish on the website of the Authority and on its own website, if such a website exists, the result of the bidding process, identifying the bid through procuring identifying number, if any and the following information, evaluation report, form of contract and letter of award, bill of quantity or schedule of requirement, as the case may be.

DESCRIPTION OF SERVICES

PROCUREMENT OF CONSULTANCY SERVICES FOR STUDY FOR ASSESSMENT AND DESIGN OF REHABILITATION AND IMPROVEMENT OF EXISTING UNDERGROUND DRAINAGE SCHEME OF SCARP AND LBOD IN SINDH

TERMS OF REFERENCE

Study for Assessment and Design of Rehabilitation and Improvement of Existing Underground Drainage Schemes of SCARP and LBOD in Sindh

The Irrigation Department, Government of Sindh intends to undertake a Study for Assessment and Design of Rehabilitation and Improvement of Existing Underground Drainage Schemes of SCARP and LBOD in Sindh by appointing a suitable qualified consultant firm.

1. Background:

The **SCARP and LBOD underground drainage schemes** comprise **vertical drainage systems** based on **deep Tubewells**, pumps, rising mains, disposal structures, and associated power supply infrastructure to control waterlogging and salinity.

These are operational in the following districts:

SCARP Districts:

Larkana, Qambar Shahdadkot, Dadu, Shikarpur, Kashmore (Kandhkot), Khairpur, Naushahro Feroze, Shaheed Benazirabad (SBA), Matiari, Sanghar, K.N. Shah, Jamshoro

LBOD Districts:

Mirpurkhas, Sanghar, Umerkot, Badin, Tando Muhammad Khan, TandoAllahyar

Left-over Areas Districts:

Ghotki, Kashmore, Sujawal, Thatta, Umerkot.

Most tubewells have exceeded their design life and are suffering from **declining discharge, excessive drawdown, saline up-coning, mechanical wear, power instability, and aquifer degradation.**

A **technically rigorous hydrogeological and electro-mechanical assessment** is essential to identify rehabilitation, replacement, and system optimization measures aligned with **vertical drainage principles.**

2. Objectives

The core objectives are as follows:

- Assess the **functional, hydraulic, hydrogeological, electrical, and mechanical condition** of existing SCARP and LBOD tubewells.

- Evaluate aquifer response, groundwater behavior, and drainage effectiveness.
- Identify non-functional, underperforming, and technically redundant wells.
- Design technically justified **rehabilitation, replacement, or augmentation measures**.
- Optimize pumping regimes to control waterlogging while avoiding groundwater mining and salinity intrusion.
- Establish a **comprehensive geo-referenced groundwater and tubewell database** for planning and O&M.
- Ensure environmental sustainability and compliance with national and donor safeguards.

3. Scope of Work

a. Inventory and Data Compilation

- Prepare a **complete inventory of SCARP and LBOD tubewells**.
- Compile existing design documents, hydrogeological reports.
- Review historical groundwater levels, salinity trends, and drainage performance.

b. Field Investigations and Surveys

- **Well registration and physical tagging** with unique IDs.
- **DGPS** for tubewell locations, ground levels, and disposal points.
- Measurement of static and dynamic water levels.
- Assessment of rising mains, disposal arrangements, and outfall connectivity.

c. Hydrogeological and Aquifer Assessment

- Conduct **step-drawdown and constant-rate pump tests** on selected representative tubewells.
- Determine aquifer parameters (transmissivity, storativity, specific capacity).
- Identify risks of **saline up-coning, lateral saline intrusion, and aquifer depletion**.
- Identify soil Analysis such as Texture, ECe, SAR, ESP
- Assess recharge rates, lateral inflows, and long-term aquifer sustainability.

d. Groundwater and Soil Salinity Assessment

- Conduct **groundwater and soil sampling** in SCARP and LBOD command areas.
- Laboratory analysis for water quality EC, TDS, SAR, RSC, and major ions.
- Prepare **district-wise groundwater and soil salinity maps**.
- Develop a **groundwater contamination inventory**, where applicable.

e. Electro-Mechanical and Power Supply Assessment

- Evaluate condition and efficiency of pumps, motors, control panels, and protection systems.
- Assess adequacy and reliability of **power supply, voltage stability, and feeder availability**.
- Recommend energy-efficient pumping systems, protection devices, and alternative power options where viable.

f. Drainage Performance Evaluation

- Assess effectiveness of existing tubewell operation in controlling **water table depth**.
- Analyze pumping schedules versus irrigation demand and rainfall patterns.
- Identify spatial gaps where waterlogging persists despite pumping.

g. Rehabilitation and Improvement Design

- Recommend **well redevelopment, re-screening, deepening, replacement, or abandonment** based on technical criteria.
- Design new tubewells where justified by hydrogeological analysis.
- Propose optimized pumping regimes and operational protocols.
- Prepare **engineering designs, technical specifications, and BOQs** for all proposed interventions.

h. Environmental and Social Safeguards

- Assess environmental impacts related to groundwater abstraction and disposal of saline effluent.
- Evaluate impacts on agriculture, drinking water sources, and ecosystems.
- Prepare mitigation measures and an **Environmental and Social Management Plan (ESMP)** in line with national and donor requirements.

i. Institutional Review

- Recommend **institutional strengthening, monitoring systems, and data-driven management frameworks.**
