WNBA star Caitlin Clark to publish a children's book based on her life

Caitlin Clark will have a picture book out this fall based on her own life, one she knows is like few others.

Random House Books for Young Readers announced Tuesday that "EXTRAordinary! A Little EXTRA to Reach BIG Dreams" will be published Nov. 3. In rhyming verse, the WNBA star shares a message about the importance of effort and support.

Clark, whose book features illustrations by Adriana Prodi, was inspired by an inscription above the mirror that hung in her childhood bedroom: "The difference between ordinary and extraordinary is the little EXTRA." "Basketball has given me so many incredible opportunities, but what has always meant the most to me are the people who've supported me along the way," Clark said in a statement. "I hope this book reminds kids that they're never alone in chasing their dreams and that giving a little extra to the people and moments is what makes them EXTRAordinary."

The 24-year-old Indiana Fever guard, widely credited with raising the profile of women's basketball, returned to action recently after injuries limited her to 13 games in 2025. She scored seven points Saturday in a preseason victory over the New York Liberty. AP

SPECIFICATIONS

[Note for Preparing the Specifications]

A set of precise and clear specifications is a prerequisite for bidders to respond realistically and competitively to the requirements of the user without qualifying their Bids. The specifications must be drafted to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, performance of the works. Only if this is done objectives of economy, efficiency, and fairness in procurement will be realized and responsiveness of Bids can be ensured, and the subsequent task of bid evaluation can be facilitated. The specifications should require that materials to be incorporated in the works be new, unused, and of the most recent or current models, and incorporated all recent improvements in design and materials unless provided for otherwise in the contract.

Samples of specifications from similar to previous procurements are useful in this respect. The use of metric units is encouraged. Depending on the complexity of the works and the repetitiveness of the type of procurement, it may be advantageous to standardize the Technical Specifications that should cover all classes of workmanship, materials and equipment although not necessarily to be used in a particular procurement.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for equipment, materials, and workmanship, recognized international standards should be used as much as possible. The specifications shall consider all conditions but not limited to seismic conditions, weather conditions and environmental impact. The specifications should state that equipment, materials, and workmanship that meet other authoritative standards, and which ensure at least a substantially equal quality than the standards mentioned, will also be acceptable. The following clause may be inserted in the Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Specifications to specific standards and codes to be met by Works to be furnished and tested, the provisions of the latest current edition or revision of the relevant shall apply, unless otherwise expressly stated in the Contract. Other authoritative standards that ensure equivalence to the standards and codes specified will be acceptable.]
