**Financial Evaluation and Scoring System for Bids
(Maximum Allocable Marks Score 20 marks)**

The financial bids of technically qualified bidders will be opened publicly at the time to be announced by the Procuring Agency and the financial bids found technically non-responsive shall be returned un-opened to the respective Bidders.

Total Allocable marks for Technical Proposal = **100**

Total Allocable marks in Financial Proposal = **20**

Total Combined Allocable Score for individual bids = Marks obtained in Technical Evaluation + Marks obtained in Financial Evaluation = **120**

Scoring Methodology:

Contract will be awarded to the most advantageous responsive firm whose product ranks highest in the Combined Evaluation scoring calculated through the Marks awarded to Technical Proposal and Financial Proposal as stated in the Bid Data Sheet of these Standard Bidding Documents.

The Evaluation Methodology is a combination of non-price factors (in Technical Criteria) and price factor (in Financial Criteria); and each having points as elaborated in the evaluation proformas provided in these SBDs.

As evident from allocable score above and because of the importance and complexities/sensitivities in the field of procurement and use of Drugs and other products

related to human lives and health, this Methodology puts greater emphasis on non-price factors like high quality of the product derived from excellent-grade raw material, stringent product certifications, international best pharmaceutical quality control practices in laboratories, pharmaco-vigilance systems for Drug safety reporting and monitoring; and the most efficient industrial processes in the manufacturing premises.

Procedure for the Marks Scoring:

Marks will be awarded or otherwise for various technical parameters

to each quoted product based on the prescribed Technical and Financial criteria. The total combined marks will determine the highest ranking product in each product category for contract award.

The formula to calculate the marks for the price by the bidders:

Financial Evaluation Score of individual quoted Product: =
[Lowest quoted Price of the item ÷ Next higher proposed Price of the competing item] X Total allocable financial score

Solved Example of Financial Scoring

- If the lowest quoted price of an item is **Rs. 86/-**, the same lowest bidder will obtain score as below:

$$= [86 \div 86] \times 20$$

= **20** marks, being the lowest bidder for the quoted item.

- If the next higher quoted price of the same item is **Rs. 105/-**, the marks obtained will be:
= $[86 \div 105] \times 20 = 16.3809$ Marks

- If the next higher quoted price of the same item is **Rs. 130/-**, the marks obtained will be:
= $[86 \div 130] \times 20 = 13.2307$ Marks

.... And so on.
