Contractor Sign & Stamp

22.3 Bids (and modifications sent pursuant to ITB Clause 21.2) that are not opened and read out at bid opening shall not be considered further for evaluation, irrespective of the circumstances. Withdrawn bids will be returned unopened to the bidders.

22.4 The Procuring agency will prepare minutes of the bid opening.

23. Clarification of Bids

24. Preliminary Examination

24.1 The Procuring agency will examine the bids to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed, and whether the bids are generally in order.

24.2 Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail, and the total price shall be corrected. If the Supplier does not accept the correction of the errors, its bid will be rejected, and its bid security may be forfeited. If there is a discrepancy between words and figures, the amount in words will prevail.

24.3 The Procuring agency may waive any minor informality, nonconformity, or irregularity in a bid which does not constitute a material deviation, provided such waiver does not prejudice or affect the relative ranking of any Bidder.

24.4 Prior to the detailed evaluation, pursuant to ITB Clause 25 the Procuring agency will determine the substantial responsiveness of each bid to the bidding documents. For purposes of these Clauses, a substantially responsive bid is one which conforms to all the terms and conditions of the bidding documents without material deviations. Deviations from, or objections or reservations to critical provisions, **such as** those concerning Bid Security (ITB Clause 15), Applicable Law (GCC Clause 30), and Taxes and Duties (GCC Clause 32), will be deemed to be a material deviation. The Procuring agency's determination of a bid's responsiveness is to be based on the contents of the bid itself without recourse to extrinsic evidence.

Contractor Sign & Stamp

24.5 If a bid is not substantially responsive, it will be rejected by the Procuring agency and may not subsequently be made responsive by the Bidder by correction of the nonconformity.

25. Evaluation and Comparison of Bids

25.1 The Procuring agency will evaluate and compare the bids which have been determined to be substantially responsive, pursuant to ITB Clause 24.

25.2 The Procuring agency's evaluation of a bid will be on delivered duty paid (DDP) price inclusive of prevailing duties and will exclude any allowance for price adjustment during the period of execution of the contract, if provided in the bid.

25.3 The Procuring agency's evaluation of a bid will take into account, in addition to the bid price quoted in accordance with ITB Clause 11.2, one or more of the following factors as specified in the Bid Data Sheet, and quantified in ITB Clause 25.4:

(a) incidental costs

(b) delivery schedule offered in the bid;

(c) deviations in payment schedule from that specified in the Special Conditions of Contract;

(d) the cost of components, mandatory spare parts, and service;

(e) the availability Procuring agency of spare parts and after-sales services for the equipment offered in the bid;

(f) the projected operating and maintenance costs during the life of the equipment;

(g) the performance and productivity of the equipment offered; and/or

(h) other specific criteria indicated in the Bid Data Sheet and/or in the Technical Specifications.

25.4 For factors retained in the Bid Data Sheet pursuant to ITB 25.3, one or more of the following quantification methods will be applied, as detailed in the Bid Data Sheet:

(a) Incidental costs provided by the bidder will be added by Procuring agency to the delivered duty paid (DDP) price at

Contractor Sign & Stamp

the final destination.

(b) *Delivery schedule.*

(i) The Procuring agency requires that the goods under the Invitation for Bids shall be delivered at the time specified in the Schedule of Requirements which will be treated as the base, a delivery "adjustment" will be calculated for bids by applying a percentage, specified in the Bid Data Sheet, of the DDP price for each week of delay beyond the base, and this will be added to the bid price for evaluation. No credit shall be given to early delivery.

or

(ii) The goods covered under this invitation are required to be delivered (shipped) within an acceptable range of weeks specified in the Schedule of Requirement. No credit will be given to earlier deliveries, and bids offering delivery beyond this range will be treated as nonresponsive. Within this acceptable range, an adjustment per week, as specified in the Bid Data Sheet, will be added for evaluation to the bid price of bids offering deliveries later than the earliest delivery period specified in the Schedule of Requirements.

or

(iii) The goods covered under this invitation are required to be delivered in partial shipments, as specified in the Schedule of Requirements. Bids offering deliveries earlier or later than the specified deliveries will be adjusted in the evaluation by adding to the bid price a factor equal to a percentage, specified in the Bid Data Sheet, of DDP price per week of variation from the specified delivery schedule.

(c) *Deviation in payment schedule.*

(i) Bidders shall state their bid price for the payment schedule outlined in the SCC. Bids will be evaluated on the basis of this base price. Bidders are, however, permitted to state an alternative payment schedule and indicate the reduction in bid price they wish to offer for such alternative payment schedule. The Procuring agency may consider the alternative payment schedule offered by the selected Bidder.

or

(ii) The SCC stipulates the payment schedule offered by

Contractor Sign & Stamp

the Procuring agency. If a bid deviates from the schedule and if such deviation is considered acceptable to the Procuring agency, the bid will be evaluated by calculating interest earned for any earlier payments involved in the terms outlined in the bid as compared with those stipulated in this invitation, at the rate per annum specified in the Bid Data Sheet.

(d) *Cost of spare parts.*

(i) The list of items and quantities of major assemblies, components, and selected spare parts, likely to be required during the initial period of operation specified in the Bid Data Sheet, is annexed to the Technical Specifications. The total cost of these items, at the unit prices quoted in each bid, will be added to the bid price.

or

(ii) The Procuring agency will draw up a list of high-usage and high-value items of components and spare parts, along with estimated quantities of usage in the initial period of operation specified in the Bid Data Sheet. The total cost of these items and quantities will be computed from spare parts unit prices submitted by the Bidder and added to the bid price.

or

(iii) The Procuring agency will estimate the cost of spare parts usage in the initial period of operation specified in the Bid Data Sheet, based on information furnished by each Bidder, as well as on past experience of the Procuring agency or other procuring agencies in similar situations. Such costs shall be added to the bid price for evaluation.

(e) *Spare parts and after sales service facilities in the Procuring agency's country.*

The cost to the Procuring agency of establishing the minimum service facilities and parts inventories, as outlined in the Bid Data Sheet or elsewhere in the bidding documents, if quoted separately, shall be added to the bid price.

Contractor Sign & Stamp

(f) *Operating and maintenance costs.*

Since the operating and maintenance costs of the goods under procurement form a major part of the life cycle cost of the equipment, these costs will be evaluated in accordance with the criteria specified in the Bid Data Sheet or in the Technical Specifications.

(g) *Performance and productivity of the equipment.*

(i) Bidders shall state the guaranteed performance or efficiency in response to the Technical Specification. For each drop in the performance or efficiency below the norm of 100, an adjustment for an amount specified in the Bid Data Sheet will be added to the bid price, representing the capitalized cost of additional operating costs over the life of the plant, using the methodology specified in the Bid Data Sheet or in the Technical Specifications.

or

(ii) Goods offered shall have a minimum productivity specified under the relevant provision in the Technical Specifications to be considered responsive. Evaluation shall be based on the cost per unit of the actual productivity of goods offered in the bid, and adjustment will be added to the bid price using the methodology specified in the Bid Data Sheet or in the Technical Specifications.

i. *Specific additional criteria indicated in the Bid Data Sheet and/or in the Technical Specifications.*

The relevant evaluation method shall be detailed in the Bid Data Sheet and/or in the Technical Specifications.

The Contractor shall submit OEM warranty certificates verifiable on the manufacturer's official portal upon delivery.
- **Preventive Maintenance (PM).** The Contractor shall perform scheduled Quarterly Preventive Maintenance (once every 3 months) across the entire campus. Austria toughening law on spying to address Vienna's 'den of spies' image

Vienna is major diplomatic hub, hosting OSCE and UN bodies; law currently only bans spying against Austria; government plans to widen its scope, toughen sentencing; Austria has repeatedly expelled Russian diplomats

VIENNA: Austria's government outlined plans on Wednesday to widen the legal definition of spying and increase the maximum sentence for it, seeking to stamp out Vienna's long-standing reputation as a den of spies after the expulsions of several Russian diplomats.

The Austrian capital, which for a decade following World War Two was divided into Allied occupation sectors, is now a major diplomatic centre. It hosts international organisations including the Organization for Security and Cooperation in Europe, and UN bodies such as the International Atomic Energy Agency.

That offers the opportunity to station intelligence agents there under the cover of diplomatic immunity. Russian diplomats expelled in recent years have worked at the Russian embassy to Austria as well as Russia's missions to the UN and OSCE.

"Vienna is repeatedly referred to (in media reports) as a capital of espionage, for historical reasons. At the same time, a certain 'Third Man' romanticism plays a role there," Foreign Minister Beate Meinl-Reisinger told reporters, referring to the film starring Orson Welles set in postwar Vienna.

"I would like to clean up and put an end to that," she said before a cabinet meeting, unveiling a bill that will be submitted to parliament after a review of several weeks.

Currently, Austrian law bans spying to the detriment of Austria, with offences subject to a maximum sentence of just five years.

The centrist coalition government plans to increase the maximum sentence to 10 years, she said, and widen the definition to also cover espionage against international organisations and the European Union, in which case a sentence of up to 5 years would apply.

"Diplomatic status should not be abused as a cover for spying activities on our soil ... We are no longer looking the other way, and we have changed course," Meinl-Reisinger said.

Austria expelled 4 Russian diplomats in October for actions incompatible with their diplomatic status, a term generally used for spying, bringing to 18 the number of Russian diplomats it has forced to leave the country since 2020.

While Austria is a neutral country, politically its governments have sided with Ukraine since Russia launched its full-scale invasion in 2022.—Reuters

India pollution monitors overwhelmed by toxic smog

NEW DELHI: India's air pollution monitors were overwhelmed this week by toxic smog so severe that concentrations exceeded their upper measurement limit, equivalent to 66 times the World Health Organisation's recommended daily maximum, regulators said.

The admission comes after opposition politicians accused authorities of deliberately allowing gaps in official readings for several hours overnight Sunday into Monday, just as pollution surged with a barrage of fireworks for Diwali, the Hindu festival of lights.

New Delhi is one of the world's most polluted capitals, where winter smog from vehicle emissions, farm fires and industry already chokes millions.

But the missing readings meant official data failed to capture the full extent of the pollution at its worst.

"The government which shuts down air quality monitoring stations on the night of Diwali, the government that does data fraud, how will you trust such a government?" Aam Aadmi Party (AAP) Delhi president Saurabh Bharadwaj said in a video posted on X.

"If Diwali night's PM2.5 (toxic particulates) is not in the record, who will answer for that air?" senior Congress party lawmaker Ajay Maken said in a social media post.

The Central Pollution Control Board (CPCB) rejected accusations of deliberate under-reporting, saying the gaps reflected "differences in measurement of pollutant concentration" rather than an attempt to conceal pollution.

Particulate matter analysers, installed when the National Air Quality Index (NAQI) was introduced in 2015, were calibrated to measure concentrations of up to 1,000 micrograms per cubic metre.

The WHO recommends a daily maximum of 15 micrograms per cubic metre for PM2.5, fine particles small enough to penetrate deep into the lungs and linked to cancer.

"The designed system of automated data validation treats hourly readings beyond the calibrated range as outside range, and such readings are not used in the computation," the Central Pollution Control Board (CPCB) said in a statement late on Tuesday.

"During extreme episodes, which are occasional like Diwali firecracker bursting, this may appear as a data gap at the particular station concerned", it added.

Although choking clouds filled the streets early Monday, the scale of the pollution was only captured when monitors resumed reporting, around eight hours after the fireworks peaked.

Readings then hit 879 micrograms per cubic metre in the Mandir Marg locality, according to monitoring organisation IQAir, which cited data from a city government station. That is more than 58 times the WHO daily limits.

"There is one thing the people of Delhi can be certain of: the fact that the data has gone missing doesn't mean the pollution has disappeared too," Congress party lawmaker Pawan Khera added.

"The poisonous smoke we have been inhaling... will continue to choke our lungs, threaten our lives and shorten our life expectancy."—AFP

US charges three 'Iranian operatives' over UK airbase plot

NEW YORK: The US Justice Department on Wednesday announced charges against three men it described as "Iranian operatives," including one already in jail, over their role in an alleged terrorist plot at Britain's RAF Fairford airbase.

Mohammad Bager Saad Dawood al-Saadi, Mohsen Mohajeri and Mohammad Ali al-Hassani allegedly helped plan and direct the September incident at the base, which has been used by the US military in its operations against Iran.

Police were called to the Fairford site in southwest England after a local farmer reported seeing a group of men with several white vans engaged in "suspicious" activity.

A US charging document states that Al-Hassani, a 35-year-old Iraqi national, directed unnamed individuals to drive to the base in the vans, some of which contained barrels of fuel.

It claims that he earlier paid the group to buy metallic objects that could be used as shrapnel, and to disguise the vehicles as being engaged in fuel delivery services.

Al-Saadi, 32, a dual Iranian-Iraqi national already jailed in New York on terrorism charges, allegedly passed coded messages to Al-Hassani and Mohajeri, 48, an Iranian national, to coordinate ahead of the plot.

Days after the incident, the United States withdrew all its B-1 bombers from the base.

"Anyone who plans a terrorist plot on a military base housing American servicemembers will be prosecuted by the United States government," Attorney General Todd Blanche said in a statement on Tuesday.

The trio were charged in an eight-count indictment that alleges their involvement in several other plots in support of Iran's Islamic Revolutionary Guard Corps and pro-Iranian group Kataeb Hezbollah.—AFP

German military survey reveals extensive sexual harassment

BERLIN: A survey of soldiers in Germany's armed forces showed extensive sexual harassment within the ranks, Defence Minister Boris Pistorius said on Wednesday, with women in particular suffering.

The survey comes with an extensive recruiting effort under way to dramatically grow the ranks of the Bundeswehr, as Germany's military is known, with hopes in particular of attracting more women to serve.

Pistorius said that 38 per cent of women in the military reported experiencing verbal sexual harassment, while 10 per cent reported physical sexual harassment.

Young women in lower ranks are particularly affected, while among men, those who are not heterosexual faced more harassment, Pistorius said.

"Zero tolerance applies to sexual harassment within the Bundeswehr," the minister said while outlining a plan to address the issue with support and prevention as well as better investigations and disciplinary measures. Two per cent of all soldiers reported having been subjected to sexual violence.

Pistorius said that the internal survey was the "very first study of its kind" for the Bundeswehr.

The study was based on 8,000 questionnaires completed by male and female service members – representing four percent of the Bundeswehr's total military personnel, which currently stands at 186,200 soldiers.

Greens party lawmaker Sara Nanni meanwhile called for the creation of an external investigative body to make it easier to report such incidents.

Since Russia's full-scale invasion of Ukraine in February 2022, Germany has sought to strengthen its defence capabilities and meet new Nato targets to counter Russian threats and offset the risks of US disengagement from Europe under President Donald Trump. —AFP

Chinese woman accused of spying on Nvidia boss entered Taiwan on HK passport

TAIPEI: The woman accused of spying for China during an affair with Nvidia chief Jensen Huang used a Hong Kong passport to enter Taiwan, the island's immigration agency said on Wednesday, as authorities investigate the incident.

Jensen Huang has admitted to having an affair, reportedly with Alice Huang, a Chinese former executive at Singapore-based Megaspeed who US officials believe was working for Chinese intelligence. Beijing has rejected the spying allegations.

Nvidia's board announced on Sunday that it had opened a probe into Jensen Huang, the company's chief executive and co-founder, who is no relation to Alice Huang.

"Our government's relevant agencies are fully informed of the relevant records and information," National Immigration Agency Director-General Lin Hong-en told reporters, confirming that Alice Huang used a Hong Kong passport to enter Taiwan.

"We were aware of all her relevant entry and exit records." It is generally easier for Hong Kong passport holders to enter Taiwan than those with mainland Chinese passports, who must also apply for special permission to travel there.

The additional restrictions are partly due to the complex relations between China and Taiwan, which Beijing claims and has vowed to bring under its control.—AFP
