Supply, Installation, Testing and Commissioning of 160 KW Hybrid Solar Photovoltaic System at COMSATS University Islamabad, Abbottabad (Dhamtore Campus)

The proposed project comprises the supply, installation, testing, and commissioning of a 160-kW hybrid solar photovoltaic (PV) system for two academic buildings, namely S-Block and C-Block.

Each academic block shall be equipped with an 80-kW solar PV array, 100 kW hybrid inverter capacity (configured as 2×50 kW hybrid inverters), and a 60 kWh high-voltage lithium Battery energy storage system (BESS). The proposed hybrid systems will operate in coordination with the existing utility supply and standby diesel generators to ensure uninterrupted operation during grid outages.

The existing electrical infrastructure comprises a 400 kVA transformer and a 150 kVA diesel generator installed at S Block, whereas C Block is served by a 200 kVA transformer and a 135 kVA diesel generator. The hybrid solar PV systems have been designed to integrate with these existing power sources through appropriate synchronization and control mechanisms.

The detailed Bill of Quantities (BOQ) for the proposed solar PV installation, including the major equipment, associated electrical works, civil works, protection systems, and commissioning requirements, is presented in Table 1. Mandatory requirements are presented in table 2.

Note: *A Pre-Bid Meeting will be scheduled on date mentioned in EPADs Version 2.0 for submission of bids to discuss the technical specifications, scope of work, system requirements, installation methodology, and other relevant provisions of the bidding documents. Prospective bidders are strongly encouraged to visit the site CUI Abbottabad Dhamtore Campus and attend the Pre-Bid Meeting to ensure that their proposals fully comply with the technical and contractual requirements.*
