Factors not included in these Bidding documents shall not be used in the evaluation of the Bidders' qualifications.

32.6 Procuring Agency may seek "Certificate for Independent Price Determination" from the Bidder and the results of reference checks may be used in determining an award of contract.

Explanation: The Certificate shall be furnished by the Bidder. The Bidder shall certify that the price is determined keeping in view of all the essential aspects such as raw material, its processing, value addition, optimization of resources due to economy of scale, transportation, insurance and margin of profit etc.

32.7 An affirmative determination will be a prerequisite for award of the contract to the Bidder. A negative determination will result in rejection of the Bidder's Bids, in which event the Procuring Agency will proceed to the next ranked Bidder to make a similar determination of that Bidder's capabilities to

TOTAL OWNING COST (TOC) EVALUATION

Distribution Transformers

1. Purpose and Application

This clause shall apply to the financial evaluation of bids for distribution transformers. HESCO shall evaluate financial bids on the basis of Total Owning Cost (TOC), which reflects both the quoted purchase price and the economic value of the bidder's guaranteed transformer losses.

The Total Evaluated TOC shall be used only for financial evaluation, comparison, ranking, and determination of the Most Advantageous Bidder. It shall not replace the contractual quoted price payable under the contract.

The lowest bidder shall be determined by using the Total Owning Cost (TOC). If a Firm has the lowest quoted unit price (lowest Schedule Price) but does not retain the lowest position after calculation of the Total Owning Cost (TOC), it shall not be considered the lowest / Most advantageous bidder.

2. Fixed Loss Capitalization Factors

For this tender, the following fixed capitalization factors shall be used. These factors are fixed by HESCO for evaluation purposes and shall not be changed, qualified, or replaced by any bidder.

Symbol	Description	Unit	Value
K1	Iron loss / no-load loss capitalization factor	PKR per Watt	299.948
K2	Copper loss / load loss capitalization factor	PKR per Watt	145.299

3. Definitions of Bidder Inputs

Symbol	Input Required from Bidder	Basis
Q	Quoted unit price of the transformer, excluding GST	PKR, FCS basis, per unit
I	Guaranteed iron losses / no-load losses	Watts
C	Guaranteed copper losses / load losses	Watts
Qty.	Quantity of the item offered	Number of units

4. TOC Formula

The bidder shall calculate the Unit TOC for each item as follows:

$$\text{Unit TOC} = Q + (299.948 \times I) + (145.299 \times C)$$

The Total Evaluated TOC shall then be calculated as follows:

$$\text{Total Evaluated TOC} = \text{Quantity} \times \text{Unit TOC}$$

The TOC amount shall be calculated excluding GST. GST shall be shown separately on the quoted amount wherever required in the price schedule.

5. Required Price Schedule Information

For each offered item, the bidder shall provide the quoted unit price excluding GST, guaranteed losses, applicable GST information, and calculated TOC values in the prescribed price schedule. Q, I, and C shall not be left blank and shall be numeric, unconditional, and consistent with the technical offer.

6. Price Schedule Format

The following format shall be used for item-wise TOC calculation and evaluation.

Sr.	Description of Goods	Qty.	Quoted Unit Price Excl. GST, Q (PKR, FCS Basis)	Guaranteed Iron Losses, I (W)	Guaranteed Copper Losses, C (W)	K1 (PKR/W)	K2 (PKR/W)	Unit TOC = $Q + (K1 \times I) + (K2 \times C)$	Total Evaluated TOC = Qty. x Unit TOC	GST on Quoted Price
1	[Transformer rating and description]	[Qty.]	[Q]	[I]	[C]	299.948	145.299	[Calculated Unit TOC]	[Calculated Total Evaluated TOC]	[GST % / amount]

7. Worked Example

Assume the following quoted and guaranteed values for a 25 kVA, 11/0.4 kV transformer:

Description	Value
Quoted Unit Price excluding GST, Q	PKR 250,000
Quantity	90 units
Guaranteed Iron Losses / No-Load Losses, I	140 W
Guaranteed Copper Losses / Load Losses, C	936 W
Step 1: Unit TOC	$250,000 + (299.948 \times 140) + (145.299 \times 936)$
Step 2: Unit TOC	$250,000 + 41,992.72 + 135,999.864 = \text{PKR } 427,992.584$
Step 3: Total Evaluated TOC	$90 \times 427,992.584$
Total Evaluated TOC Price	PKR 38,519,332.56

Filling of Form for Calculation of TOC

Sr.	Description of Goods	Qty.	Quoted Unit Price Excl. GST, Q (PKR, FCS Basis)	Guaranteed Iron Losses, I (W)	Guaranteed Copper Losses, C (W)	K1 (PKR/W)	K2 (PKR/W)	Unit TOC = $Q + (K1 \times I) + (K2 \times C)$	Total Evaluated TOC = Qty. x Unit TOC	GST on Quoted Price
1	25 kVA, 11/0.4 kV Transformer	90	250,000	140	936	299.948	145.299	427,992.584	38,519,332.56	18%

8. Evaluation and Basis of Award

- i. The financial comparison shall be made on the basis of the Total Evaluated TOC and not merely on the quoted unit price.
- ii. The bidder with the lowest Total Evaluated TOC, after being determined eligible, technically compliant, commercially compliant, and substantially responsive, shall be considered for award as the Most Advantageous Bidder, subject to approval of the competent authority and completion of all procurement formalities.

 - This office letter No. 1137-49/CEDS dated 06.03.2013.
 - This office letter No. 4331-41/CEDS dated 19.12.2014.

From time to time recommendations/suggestions from this office and the quarter concern regarding the improvement of quality and performance of subject material has been circulated vide above referred letters.

The following suggestions have been consolidated by incorporating all previous instructions, and other mandatory requirements in order to ensure the quality and performance of subject material:-

- a. To improve the quality of products, it is recommended to use the prime quality new material and discourage the use of scrap/second hand material/substandard components in manufacturing of products procured by DISCOs.

Undertaking/declaration certificate from the Bidders regarding use of prime material (specimen attached) should be obtained as mandatory and should be included as a part of tender documents vide this office letter referred above at Sr. No.(i). A draft of authority/declaration certificate is attached for guideline (Annexure/A).

Education Purchase Order For New Manufacturer/Entrant

- c. The firm having no past experience and supply record should be considered only for an educational order of limited quantity (as minimum as possible) to encourage new manufacturer/entrant. Education orders should be placed on the firms to seek prototype approval from this office and satisfactory field performance vide this office letter referred above at Sr. No.(v) and regular order should be placed after establishing the satisfactory post field performance issued by Chief Engineer (MM) of concerned DISCOs on behalf of Chief Executive Officer.

d. If a DISCO issue educational purchase order to any manufacturer/entrant and that DISCOs will inform to other DISCOs in order to avoid issuance of other educational purchase order from any DISCO before the completion of delivery and issuance of satisfactory performance of first educational purchase order. Also this would be the responsibility of manufacture to intimate DISCOs and this office regarding their educational purchase orders. If manufacturer take more than one educational purchase order then all other educational purchase orders shall be cancelled except the first one of limited quantity. DISCOs must acquire undertaking in advance from the manufacturers/entrant to the effect that the manufacturer has not taken such educational purchase order before from any DISCO as already circulated vide this office letter referred above at Sr. No.(vi).

e. The performance requirement for educational purchase order is minimum three months after the satisfaction of DISCO. The three (3) months performance of 100% quantity should be considered from the date of installation of last quantity of material/product. However for the rigorous performance, the product should be monitored for one complete cycle of climate of the Country including sever "Hot Summer" and "Cold Winter" conditions.

If regular purchase orders for subject material is placed after the three months satisfactory performance, but not for complete cycle then the warranty of the product should be doubled to cover risk of DISCOs and after the satisfactory performance of one complete cycle of the climate, the warranty period should be same as practice in formal purchase order.

f. A team of experts should be involved in prototype testing/approval process who should examine all relevant aspects with respect to the design and techniques employed. In order to detect all possible discrepancies/flaws of design and quality at this stage and avoid problem later on. It is recommended that the products/material supplied against the educational purchase order should immediately be installed for field performance and for their proper monitoring. The product/material must be installed in one Division or preferably in one Sub Division for proper monitoring. In case of educational purchase order for distribution transformer, the distribution transformer should preferably be installed on the general public connections rather than individual/independent consumer.

Also it is recommended that concerned M&T and Surveillance Department Team should periodically monitor the performance of the product supplied against the educational purchase order.

It should also include additional in-situ testing of the prototype meter in the field for a sufficient time (at least 3 months), so as to ascertain a real life performance of the material.

The DISCO should observe the supply of educational purchase orders and pressed upon supplier to complete the educational order on time. The performance report of the subject material should be considered while processing the further purchase of material/product vide this office letter referred above at Sr. No. (ii).

- h. The field performance of the material must be issued by Chief Engineer (MM) of concerned DISCOs on behalf of Chief Executive Officer after 100% completion and installation of educational order for the performance period mentioned above after 100% completion and installation of educational order for the performance period mentioned above.
- i. For 11 kV Switchgear panel (industrial panel) those manufacturers who are not directly importing the VCBs by themselves, they must supply certificate from the authorized local agent in lieu of import documents.
- j. It should be made incumbent upon the supplier/manufacturers of the 11kV Panels to present their import documents for the complete VCB trolley (either in completely assembled or disassembled form) to the NTDC/DISCOs inspector at the time of inspection and also, submit the same to the procurement agency along with the inspection call for the verification of the genuineness of the VCBs and to make sure the compliance of the same to the prototype approval.
- k. The local manufacturers of 11 kV Switchgear Panels (industrial panel) those are using 11kV vacuum Circuit Breakers in their panels which are not approved by this office or by Chief Engineer Design NTDC should not be allowed/placed order for the use of breaker until or otherwise they get their approval from the above said offices.

All DISCOs should immediately implement above mentioned recommendations in their procurement and already issued educational orders and it should be mandatory in Tenders/Purchase Orders to supplier for manufacturing the product by ensuring quality and genuineness.
