Title: Bi-Annual Inspection Services for Fall Arrest System at PSO Tarujabba Depot in Accordance with Applicable Safety Standards and Regulations

S.No.	Description/Specifications	Location	Unit	Qty	Unit Price Rs.	Amount Rs.
1	<u>Fall Arrest Inspection</u>	Tarujabba				
		(Depot)				
1.01	<u>THIRD PARTY INSPECTION VISIT</u> =====		EA	80		
	> The scope of work covers the inspection and functional assessment of 40 Fall Arrest Systems installed within the facility, comprising 24 units installed on the Filling Gantry and 16 units on the Decantation Gantry.					
	> This Activity will be done twice a year (Bi-Annually)					
	> Invoice will be processed partially i.e. upon completion of 1st batch inspection, invoice will be submitted.					
	> The objective is to ensure all systems are in safe working condition, conforming to specifications and applicable safety standards.					
	=====					
	Scope of Work					
	1. Visual Inspection of each Fall Arrest System to examine its apparent physical condition, including anchor points, lifelines, connectors, harnesses, and retractable blocks for signs of wear, deformation, corrosion, or damage.					
	2. Verification of Installation Integrity to confirm that all anchorage and structural mounting arrangements are secure and comply with design and load specifications.					
	3. Operational Function Testing of all retractable and locking mechanisms to ensure proper movement, locking response, and retraction.					
	4. Confirmation of Safe Working Load and performance rating in accordance with the applicable standards (such as ANSI/ASSP Z359.14-2021, BS, EN 795, OSHA 1910/1926). The assessment to be accepted only based on any of the mentioned standard.					
	5. Proof Load / Functional Load Test (as applicable) to verify the strength and reliability of anchorage points and lifeline assemblies.					
	6. Final Inspection and Validation following all tests to confirm the systems' readiness for safe use.					
	7. Tagging / Identification of inspected units with unique identification numbers and inspection status labels (e.g., Pass, Fail,
